

HTML.txt

<title>

Anatomy of an HTML Document

Begginer Friendly

</title>

HTMLtype.txt

```
<!DOCTYPE html>
<!-- Declares the document type and
version: HTML5.
Helps browsers render the page correctly.
Always appears at the top. --&gt;

&lt;html lang="en"&gt;
<!-- Root of the HTML document.
'lang="en"' specifies the language
(English), useful for accessibility and
SEO. --&gt;</pre>
```

Head.txt

```
<head>
    <!-- HEAD contains metadata: info *about* the document, not displayed on
the page. -->

    <meta charset="UTF-8">
        <!-- Defines the character encoding. UTF-8 supports most characters
(emojis, symbols, etc.). -->

    <meta name="viewport" content="width=device-width, initial-scale=1.0">
        <!-- Ensures responsive behavior: scales layout to device width on
mobiles/tablets. -->

    <meta name="description" content="Describe your website here for SEO">
        <!-- Improves search engine ranking and previews on social platforms. -->

    <meta name="author" content="Your Name">
        <!-- Optional: credits the page creator or company. -->

    <title>My Web Page</title>
        <!-- Title shown on browser tab and in search results. Important for UX
and SEO. -->

    <link rel="stylesheet" href="styles.css">
        <!-- Links to external CSS file for styling. Can be local or CDN. -->

    <link rel="icon" href="favicon.ico" type="image/x-icon">
        <!-- Icon shown on browser tab (optional). Improves branding. -->
</head>
```
