5 MUST KNOW HTML TAGS

#2 <datalist> Tag:

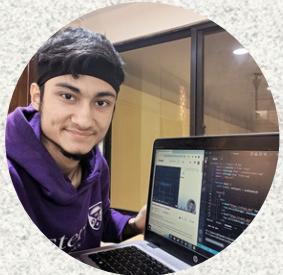

The <datalist> tag provides a list of predefined options for an input element in HTML.

Example:

```
● ● ●  
  
<input type="input" list="colors">  
<datalist id="colors">  
  <option value="red"></option>  
  <option value="brown"></option></datalist>
```

HTML

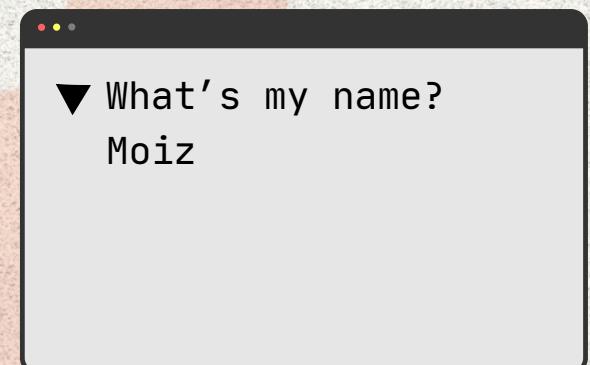

5 MUST KNOW HTML TAGS

#3 <details> + <summary> Tag:

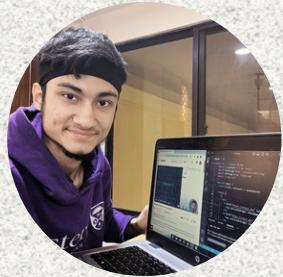

The <details> tag creates a collapsible FAQ-like section with a summary, without needing CSS.

Example:

```
●●●  
  
<details>  
  <summary>What's my name?</summary>  
  Moiz.  
</details>
```

HTML

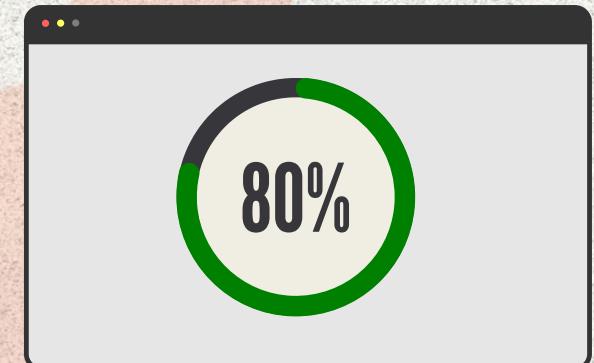

5 MUST KNOW HTML TAGS

#5 <fieldset> and <legend> Tag:

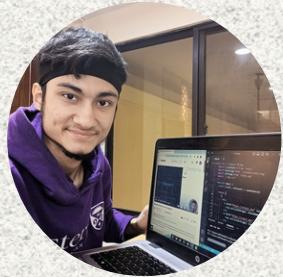

The `<fieldset>` tag groups related form elements, with the `<legend>` tag adding a title to the group.

Example:

```
●●●  
  
<fieldset>  
  <legend>Title goes here</legend>  
  <p>Content goes here</p>  
</fieldset>
```
